

Coding Conventions

- Always declare variables with var
- Always use semicolons
- 4 spaces per tabs in JavaScript, 2 spaces in templating files (e.g. HTML)
- Capitalization:
 - Variables, function names: lowerCaseCamelCase
 - Class names: UpperCaseCamelCase
 - Constants: UPPER_CASE_UNDERSCORE
- Curly brackets: opening bracket on the same line as code, closing bracket on own line
 - Always use brackets, even for one liners
- Quotes: single quotes in JavaScript, double quotes for template files
- Documentation: JSDoc style for functions
